Introduction

The Graf Archive covers the majority of the moon Orchis 2. Its endless shelves, galleries, and databanks contain texts, artworks, antiques, and preserved plants and animals from every sector of the galaxy.

Items that cannot be immediately identified are moved to the underground Shadow Stacks, where they wait to be processed, often for many years. Venturing into these dusty basements is an important part of an Archivist's training, a kind of final exam. The challenge is to come back with an unexpected treasure. It can be dangerous, as one young student discovered when the mummified ghest he was examining turned out to be merely hibernating. . . .

These ancient hand-drawn maps were unearthed from the Shadow Stacks by a far luckier student. The Head Curator's theory is that they are the work of the great Ithorian artist Gammit Chond. We know very little about Chond—few of his works have survived—but these maps show much of his characteristic style and flair.

Chond never traveled off-world, and it is rumored that he never ventured more than a day's walk from his home. However, he was fascinated by the tales of travelers, and many of his works depict their stories of adventure in the rest of the galaxy.

Of course, these maps are not strictly accurate. No one should try to cross the Jundland Wastes using Chond's map of Tatooine. The artist was more interested in the feel of these strange worlds and the galaxy-shaking events that took place on them.

These maps seem to be centered on the saga of the legendary Skywalker family. While many of the things Chond has included are facts, some may merely be tales spun by explorers. Together, it all presents a unique view of a fascinating slice of history.

After several years of painstaking restoration, it is my great privilege, and that of the Graf Archive, to present this never-before-seen collection of art to the galaxy.

THE GALAXY

The galaxy is generally thought to be divided into the following regions. Galactic North is the direction toward the top of this chart.

Deep Core Densely packed stars rotate around the super-massive black hole at the heart of the galaxy. It is dangerous to navigate, and few travelers venture this far outward.

Core Worlds The richest and most important worlds cluster around the edges of the Deep Core. These include Coruscant, Corellia, Kuat, Historic Prime, and other key systems.

Colonies This region contains planets colonized by the Core worlds. The Colonies sit along major trade routes, and some of them are extremely wealthy.

Inner Rim When first settled, this area was known simply as the Rim and it was the frontier of galactic civilization for centuries. As colonization spread further outward, the Inner Rim worlds prospered.

Expansion Region With competition for resources across the steel to expand, and the Expansion Region contains newer colonies sponsored by their outward neighbors.

Mid Rim Many important worlds are found in the Mid Rim, including Naboo, Kashyyyk, Ithor, and Malastare. Because it is relatively far from the Core, travelers should be wary of pirates.

Outer Rim Territories The largest region of the known galaxy is the Outer Rim, which contains many strange and often savage worlds. Some of the most important worlds in the Confederacy of Independent Systems—otherwise known as the Separatists during the Clone Wars—were in this region.

Unknown Regions The westward arm of the galaxy is mapped but largely unexplored. Who knows what lurks in the dark spaces beyond the frontiers of galactic civilization?

Wild Space Beyond the Outer Rim lies the unmapped expanse of Wild Space. Explorers and cartographers seek their fortune here at their peril.

Timeline

This timeline describes the period of history covered in these maps, from the Clone Wars between the Republic and the Separatists, to the Galactic Civil War between the Empire and the Rebel Alliance, and beyond.
Dates in this book are given using the "ABY-BBY" dating system, which is centered on the Battle of Yavin, when the first Death Star was destroyed. Therefore, 5 BBY is five years before the Battle of Yavin, and 5 ABY is five years after.

32 BBY The galaxy is governed by the Republic. On the capital world, Coruscant, senators from a thousand worlds meet to debate the future while the Jedi Order maintains peace and harmony.

The powerful Trade Federation, which controls galactic trade, bullies the remote world Naboo. Two Jedi, Qui-Gon Jinn and Obi-Wan Kenobi, are sent to negotiate peace. However, the Trade Federation tries to assassinate the Jedi and sends its battle droid armies to Naboo to capture Queen Padmé Amidala.

Qui-Gon Jinn and Obi-Wan Kenobi rescue the queen but are forced to flee. Their ship needs repairs, so they stop on the remote desert world Tatooine. Here they meet a slave boy named Anakin Skywalker, whose potential as a Jedi is the greatest Qui-Gon has ever seen. The Jedi win Anakin's freedom and take him away with them.

The Jedi escort Queen Amidala to Coruscant, but she cannot persuade the Senate to help Naboo. She returns to her homeworld with Qui-Gon, Obi-Wan, Anakin, and their Gungan friend, Jar Jar Binks. The Gungans fight a battle against the Trade Federation's droid army as the queen retakes her palace.

A sinister and deadly assassin—the Sith Lord Darth Maul—has been tracking the Jedi. He and his master, Darth Sidious, are secretly behind the Trade Federation's invasion. In a fierce battle beneath the city of Theed, he slays Qui-Gon Jinn. But Obi-Wan cuts Darth Maul in half, seemingly destroying him.

32 BBY The Gungans and the Naboo forces defeat the droid army with the help of Anakin Skywalker. The Trade Federation is forced to withdraw.

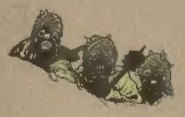
22 BBY Senator Palpatine of Naboo is made Supreme Chancellor. Secretly, he is the evil Sith Lord Darth Sidious. He plans to start a galactic war to scare the Republic into building up the military he needs in order to seize absolute power for himself.

The former Jedi Master Count Dooku has sparked a crisis, with his Confederacy of Independent Systems—the so-called Separatists—threatening to split from the Republic. The Senate must decide whether or not to create an Army of the Republic. Padmé Amidala, who is now a senator, is a major opponent of this plan.

A series of attempts on Senator Amidala's life leads Obi-Wan Kenobi to the planet Kamino. Here, he discovers an army of clones. They were secretly ordered by a now-dead Jedi Master and are based on the bounty hunter Jango Fett, who is the assassin Kenobi has been seeking. He follows Fett to Geonosis.

Anakin, now a Jedi apprentice, is assigned to protect Padmé. They travel to Naboo together, where they begin to fall in love. But Anakin is troubled by dreams about his mother, Shmi, whom he was forced to leave behind on Tatooine many years ago.

On Tatooine, Anakin discovers that his mother has been kidnapped by the Sand People. He is unable to save her life, and in a rage, he slaughters the entire tribe.



Obi-Wan is captured on Geonosis by the Separatists. They also capture Anakin and Padmé when the couple tries to rescue Obi-Wan.

Jedi Master Mace Windu leads a team of Jedi to the rescue, backed by the clone army that now serves the Republic. Windu slays Fett, but Count Dooku escapes, pursued by Anakin Skywalker and Obi-Wan Kenobi.

22 BBY

The Jedi catch up with Dooku, but he reveals that he is the Sith Lord Darth Tyranus, the new apprentice of Darth Sidious. He easily defeats both Anakin and Obi-Wan. It is only the last-minute intervention of Grand Master Yoda that saves them. Dooku is forced to flee, but his work is done. The Republic now has its army.

On Naboo, Anakin marries Padmé Amidala in secret. Meanwhile, the Clone Wars have begun as the Separatists under Count Dooku battle Palpatine's Republic armies.

The armies of the Republic are now led by the Jedi. Master Kenobi and Jedi Knight Skywalker defeat a Separatist invasion of the planet Christophsis with the help of Ahsoka Tano, Skywalker's new Padawan apprentice.

The Separatists attempt to turn the planet Rodia against the Republic, capturing Senator Amidala. She escapes with the help of Jar Jar Binks and keeps Rodia's support.

21 BBY

With the help of the Twi'lek freedom fighter Cham Syndulla, Master Mace Windu retakes the planet Ryloth from the Separatists. Their heroic actions are long remembered in song among the Twi'lek people.

Republic forces launch a massive attack on Geonosis, the home of the Separatists' droid armies. They destroy the vast battle-droid factories.

20 BBY

The Nightsisters of Dathomir attempt to assassinate Count Dooku. In revenge, he sends his army, led by General Grievous, to destroy them. Despite the witch Old Daka raising an army of the undead to oppose his droids, Grievous is successful.

The former Sith Lord Darth Maul, who was thought to have perished during the Battle of Naboo, resurfaces with his fearsome apprentice, Savage Opress. Now equipped with cyborg legs, he seeks revenge on his one-time master, Darth Sidious, and his enemy Obi-Wan Kenobi.

20 BBY

Onderon's king, Sanjay Rash, sides with the Separatists. With the help of Ahsoka Tano, a group of rebels led by Steela Gerrera and her brother Saw fights bravely to resist them. The Onderon rebels would eventually form part of the Rebel Alliance.

19 BBY

Maul's Shadow Collective, formed of Death Watch members and various criminal gangs, takes over the planet Mandalore. As revenge on Obi-Wan Kenobi, Maul kills Duchess Satine Kryze, for whom Kenobi had strong feelings. Maul's victory is short-lived, as Darth Sidious arrives to defeat both him and Opress.

Ahsoka Tano is framed for a Separatist bombing by the traitorous Jedi Padawan Barriss Offee. Though her innocence is eventually proven by her master, Anakin Skywalker, she decides to leave the Jedi Order.

The Separatists attack Coruscant and kidnap Chancellor Palpatine. Skywalker and Kenobi mount a rescue. Skywalker defeats Dooku in single combat, and Palpatine goads him into killing the Count, who was secretly his own apprentice.

Though he is the hero of the battle of Coruscant, Anakin is troubled by the Jedi's mistrust of him and his mentor Chancellor Palpatine. He is also plagued by dreams that seem to predict the death of his wife, Padmé.

Anakin discovers that Palpatine is Darth Sidious, but the Sith Lord promises he can help save Padmé. When Mace Windu tries to arrest the Chancellor, Anakin helps destroy Master Windu. He falls to the dark side and his new master names him Darth Vader.

Vader is sent to the Jedi Temple to massacre all those he finds there. Meanwhile, Palpatine issues Order 66 to the clone army—a secret command enforced by a chip in the clones' brains that compels them to assassinate the Jedi. Almost all the Jedi perish, though Obi-Wan Kenobi and Grand Master Yoda survive.

19 BBY

On Utapau, Obi-Wan Kenobi's clone troops have cornered General Grievous, but they turn their fire on Kenobi as Order 66 is issued. Obi-Wan escapes and duels Grievous, killing the cyborg.

Grand Master Yoda goes to the Senate on Coruscant to confront Darth Sidious, but he is unable to defeat the Sith Lord in combat. The Jedi retreats and exiles himself to the swampy planet Dagobah.

Vader travels to the lava world Mustafar, where he slays the Separatist leaders, ending the Clone Wars for his master. Obi-Wan follows him and defeats him in an epic duel. Vader's injuries are severe and require him to wear a black cyborg suit of armor to survive.

Padmé Amidala gives birth to twins, Luke and Leia, but does not survive. Luke is hidden on Tatooine with the Lars family, and Leia is adopted by Senator Bail Organa of Alderaan.

Supreme Chancellor Palpatine declares himself the Galactic Emperor.

5 BBY

On the remote planet Lothal, a group of rebels led by Hera Syndulla of Ryloth and the former Jedi Padawan Kanan Jarrus is formed. Ezra Bridger, an orphaned street thief, joins the crew of their ship, the *Ghost*, and begins to train in the ways of the Jedi.

4 BBY

After many battles, Kanan Jarrus is captured by the Grand Inquisitor, a fearsome Jedi hunter. He is taken aboard Grand Moff Tarkin's flagship, the *Sovereign*, in orbit above Mustafar. A daring raid by his friends frees Jarrus, who then defeats the Inquisitor in combat. The Inquisitor and the *Sovereign* are both destroyed.

0 BBY

A covert team of rebel agents is tasked with a crucial mission—to steal the plans of the Empire's new battle station, the Death Star. The mission is led by Cassian Andor and Jyn Erso. The Rogue One team goes to the planet Jedha.

0 BBY

Darth Vader captures the *Tantive IV* and its passenger Princess Leia Organa, the senator from Alderaan. He accuses her of being a rebel traitor who possesses the Death Star plans, but the princess has already sent them off the ship, in her droid R2-D2.

R2-D2 and his counterpart, C-3PO, meet Luke Skywalker on Tatooine and take him to meet Obi-Wan Kenobi. When the Empire kills his aunt and uncle, Luke decides to train as a Jedi and to fight for the rebels against the Empire.

Luke, Obi-Wan, R2-D2, and C-3PO travel to Mos Eisley spaceport, where they hire Han Solo and Chewbacca to take them and the secret plans to the rebels on Alderaan. They travel in Solo's ship, the *Millennium Falcon*, to Alderaan, only to discover that the planet has been destroyed by the Death Star. The crew rescues Leia from Imperial custody and they flee to the *Millennium Falcon*.

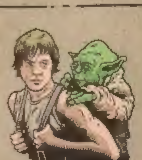
Obi-Wan confronts his former pupil, Darth Vader. He sacrifices himself, becoming one with the Force, as his friends make their escape. The Empire tracks the *Falcon* to the moon Yavin 4.

As the Death Star closes in on their base, the rebels launch a desperate starfighter raid against the battle station. Using the Force, Luke Skywalker fires the shot that destroys it, earning a key victory for the Rebellion.

3 ABY

Darth Vader sends probe droids across the galaxy and eventually locates the new rebel base on Hoth. His invasion force is able to destroy it, but not before the rebels escape. Meanwhile, Luke is visited by the spirit of Obi-Wan Kenobi, who tells him to travel to Dagobah.

Luke meets Yoda on Dagobah and begins his Jedi training. Han, Leia, Chewbacca, and the droids stop at Bespin to repair the *Falcon*, unaware that Vader's bounty hunter Boba Fett has tracked them there.



3 ABY

Vader captures Luke's friends and freezes Han Solo in carbonite. Han's friend the Baron Administrator of Cloud City, Lando Calrissian, struggles with his conscience as Boba Fett takes Solo away as a trophy for Jabba the Hutt.

Luke travels to Cloud City to rescue his friends. He confronts Vader, who defeats him in a duel. Vader reveals that he is Luke's father and Luke narrowly escapes in the *Millennium Falcon*.

4 ABY

Leia, Lando, Chewbacca, R2-D2, and Luke rescue Han Solo from Jabba's palace on Tatooine, slaying the vile gangster. Luke is now a full-fledged Jedi Knight.

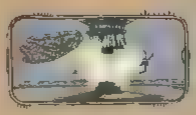
Luke returns to Dagobah, where his master Yoda has reached the end of his life. The ancient Jedi tells Luke about his family—including the fact that Leia is his sister—and becomes one with the Force.

The Rebel Alliance is informed that a second Death Star is nearing completion and that the Emperor will be on board. The rebels plan to destroy it in an all-out attack. Their fleet assembles for the raid, without realizing that it is a trap and the battle station is already operational.

Han Solo leads a commando team to the sanctuary moon of Endor to destroy the shield generator protecting the Death Star. The rebels meet the Ewoks, who help them.

Luke Skywalker strikes down his father, Darth Vader, but refuses to kill him, knowing that would lead him to the dark side. The Emperor decides to kill Luke, but Anakin Skywalker cannot bear to see his son destroyed and instead sacrifices his own life to defeat the Emperor.

Luke escapes the Death Star. With the shield down, Lando Calrissian and Wedge Antilles destroy the battle station. Not long afterward, the Empire is finally defeated at the Battle of Jakku, and a New Republic is formed



34 ABY

Kylo Ren, the dark enforcer of the First Order, seeks a map to the location of Luke Skywalker, who has withdrawn from galactic affairs. However, the explorer Lor San Tekka has already given it to the Resistance pilot Poe Dameron and his droid, BB-8.

A First Order stormtrooper, FN-2187, and a scavenger, Rey, are brought together on Jakku with BB-8. They flee the First Order in a stolen ship, the *Millennium Falcon*, found in a junkyard. Soon they are intercepted by Han Solo and Chewbacca.

Han Solo takes FN-2187 now Finn and Rey to Takodana. He asks Maz Kanata to arrange passage for BB-8's precious data. The First Order learns of this, and Kylo Ren attacks, capturing Rey and destroying Maz's castle.

The Resistance must attack the First Order's superweapon, Starkiller base, after it destroys the Senate along with the Hosnian system. A small team will travel to the base to take down the planetary shields so that fighters can attack.

Finn, Han Solo, and Chewbacca fly the *Millennium Falcon* to Starkiller base and meet Rey, who has freed herself from Kylo Ren's clutches. Together, they manage to take down the planetary shields and plant explosives.

Han Solo pleads with his son, Ben now known as Kylo Ren—to turn away from the dark side. But Ren embraces the darkness within himself and slays his father.

With her Force abilities suddenly awakened by the danger, Rey takes the lightsaber of Luke Skywalker and defeats Kylo Ren in battle

Poe Dameron leads his X-wing squadron in an attack run on the Starkiller and fires the shots that destroy the monstrous weapon. Rey, Finn, and Chewbacca escape just as the base explodes.

Historical Figures

This turbulent period in the history of the galaxy produced many valiant heroes and terrifying villains. From the Clone Wars to the Galactic Civil War and beyond, here are some of the famous—and infamous—faces in this book.

Admiral Ackbar

A legendary soldier and brilliant tactician, Ackbar rose to the rank of admiral for the Alliance to Restore the Republic, commanding the rebel fleet. His exploits during the Clone Wars with the Mon Calamari Guard helped Prince Lee-Char win the planet's throne and defeat a Separatist plot.

Padmé Amidala

The elected queen and senator from Naboo, Amidala fought desperately against the invading Trade Federation and brought the Jedi into the war. Her secret marriage to Anakin Skywalker ended tragically, as he fell to the dark side. A heartbroken Padmé died shortly after giving birth to Luke and Leia.

Wedge Antilles

The rebel pilot Wedge Antilles had the distinction of helping destroy not one but two Death Stars. He was one of the few survivors of the strike force at the Battle of Yavin and personally blew up the reactor of the second Death Star at Endor. He later flew crucial secret missions for the New Republic.

Cad Bane

The ruthless and deadly Duros bounty hunter was famed for his exploits during the Clone Wars—a daring holocron theft from the Jedi Temple, a prison break on Coruscant, and the kidnap of the Republic's Supreme Chancellor, Palpatine. There was no job he would not take on—for the right price.

BB-8

The faithful companion to Resistance pilot Poe Dameron, BB-8, a spherical astromech droid, was entrusted with the map to Luke Skywalker by his master. After meeting Rey and Finn, he managed to succeed in his mission. BB-8 was a clever and resourceful droid, well aware of his ability to charm.

Jar Jar Binks

Jar Jar Binks met Qui-Gon Jinn and Obi-Wan Kenobi during the invasion of Naboo and became friends with the Jedi and Queen Amidala, whom he helped rescue. Later, he became a representative for his planet in the Galactic Senate, unwittingly helping Chancellor Palpatine seize absolute power.

Ezra Bridger

With his parents arrested by the Empire for rebellious activities, Ezra grew up on the streets of Lothal's Capital City, stealing to survive. A chance encounter with the former Jedi Kanan Jarrus and his Spectre cell led Ezra to become Jarrus's apprentice and part of the early Rebel Alliance.

C-3PO

A protocol droid built from spare parts by Anakin Skywalker in his childhood on Tatooine, C-3PO was fluent in over seven million forms of communication. Despite his anxious nature, C-3PO played a pivotal role in the Galactic Civil War, alongside his constant companion and counterpart, R2-D2.

Lando Calrissian

The roguish gambler Lando Calrissian lost his ship the *Millennium Falcon* to his friend Han Solo in a game of sabacc. Later as Baron Administrator of Cloud City, he betrayed Solo to the Empire but soon had a change of heart. General Calrissian helped the rebels destroy the second Death Star at the Battle of Endor.

Chewbacca

The legendary Wookiee Chewbacca fought for the Republic in the Clone Wars and later gained fame as one of the heroes of the Battle of Yavin. He and his friend Han Solo became key figures in the Rebellion. An ace pilot and engineer Chewbacca was also a mighty warrior and crack shot with his bowcaster.

Poe Dameron

Poe Dameron was an ace pilot for the Republic who was recruited by General Organa for her Resistance organization. He helped secure the map to the location of Luke Skywalker, deep in the First Order's captivating and interrogating hum, and fired the shots that destroyed the Starkiller superweapon.

Count Dooku

Dooku trained as the Padawan of Jedi Master Yoda and became a Jedi Master himself. He came to believe the Republic was corrupt and left to raise a Separatist army against it. As the Sith Lord Darth Tyrannus, he was the apprentice of Darth Sidious until his master betrayed him. He was killed by Anakin Skywalker.

Bora Fett

Bobo was a clone of his "father," Jango Fett, and as a boy witnessed his death at the hands of Jedi Master Mace Windu. He grew up to become one of the galaxy's most dangerous bounty hunters. Near the end of the Galactic Civil War, he fell into a sarlacc pit on Tatooine while working for Jabba the Hutt.

Jango Fett

The galaxy's most feared bounty hunter, Jango Fett was chosen as the genetic template for the Republic's clone troopers as part of a plot by the Sith Lords Chancellor Palpatine and Count Dooku. He fought Obi-Wan Kenobi on Kamino and was killed during the Battle of Geonosis by Jedi Master Mace Windu.

Finn

Raised from infancy to be a stormtrooper for the First Order, FN-2187 was a model soldier until his first combat mission. He refused to fire on innocent people and fled the First Order with the Resistance pilot Poe Dameron, who gave him the name Finn. He then helped his new friends destroy Starkiller base.

Grand Inquisitor

Inquisitors were dark side–using Jedi hunters, employed by Emperor Palpatine to seek out survivors of Order 66. The Grand Inquisitor was sent to the planet Lothal to find Kanan Jarrus, but after a series of battles, Jarrus defeated him in a duel aboard the Star Destroyer *Sovereign*, and the Grand Inquisitor was destroyed.

General Grievous

The Kaleesh warrior Grievous was a fearsome cyborg, with almost all of his original body replaced by mechanical "upgrades." Trained in lightsaber combat by Count Dooku, Grievous became a key Separatist general, commanding vast droid armies. He was killed by Obi-Wan Kenobi near the end of the Clone Wars.

Jabba the Hutt

The vile gangster ruled a criminal empire from his palace on Tatooine. After a bounty hunter brought him Han Solo, the Hutt's former employer, Jabba hung Han frozen in carbonite on the wall of his throne room. When Luke Skywalker rescued Han, Princess Leia slayed the Hutt.

Kanan Jarrus

Caleb Dume was only a Padawan learner when Order 66 happened, and his master Depa Billaba was killed helping him escape. Taking the name Kanan Jarrus, he fled his old life until events forced him to take up his lightsaber once more. His rebel cell became a serious threat to the Empire.

Qui-Gon Jinn

A powerful and unusual Jedi Master, Qui-Gon Jinn was trained by Count Dooku and in turn was the master of Obi-Wan Kenobi. He learned the secret of maintaining his consciousness after death, a power he passed on to Yoda and Kenobi. Jinn was slain by the Sith Darth Maul during the invasion of Naboo.

Obi-Wan Kenobi

Famed as a wise negotiator and cunning warrior, Obi-Wan Kenobi fought with intelligence and courage in the Clone Wars. With the rise of the Empire, he took it upon himself to watch over Luke Skywalker and trained him as a Jedi. He sacrificed himself against Darth Vader to save Luke, but his spirit lived on.

Lobot

Lobot had cybernetic implants put into his brain by the Empire, enabling him to run complex calculations for them. While helping Lando steal Emperor Palpatine's yacht, he was seriously injured and his cyborg brain took over. Later, he helped the crew of the *Millennium Falcon* escape Cloud City.

Darth Maul

Maul, a Zabrak from Dathomir, was born to Talzin of the Nightsisters but kidnapped by Darth Sidious as a child. Through years of cruel training, he became a devastating Sith warrior and slew the Jedi Master Qui-Gon Jinn. He was then trained by Obi-Wan Kenobi, only to rise again as a cyborg crime lord.

Mon Mothma

Mon Mothma was senator for the planet Chandrila during the Clone Wars, but as Supreme Chancellor Palpatine tightened his grip on the Republic, she began to form a network of resistance. She became a key leader in the Alliance to Restore the Republic and later served as the first chancellor of the New Republic.

Hondo Ohnaka

Hondo was a cunning Weequay pirate and leader of the Ohnaka Gang, operating from the Outer Rim planet Florrum. They engaged in kidnapping for ransom, robbery, black-market arms trading, and extortion. A born survivor, he lived through clashes with the Jedi, the Separatists, and Darth Maul.

Savage Opress

Savage was a Nightbrother warrior who was infused with dark magicks by his mother, Talzin, and transformed into a monstrous warrior. He learned the dark side as an apprentice under Count Dooku and, later, his brother Maul. The brothers dueled Darth Sidious, who defeated them and slew Opress.

Zeb Orrelios

The Empire brutally massacred the Lasat people, from the Outer Rim world Lasan. One of the few survivors was Garazeb Orrelios, a member of the Lasan Honor Guard. A formidable warrior, the gruff but good-hearted Orrelios became a member of a rebel cell that came together on Lothal.

Leia Organa

Leia was raised as a princess by her adoptive parents on Alderaan and grew up to become both a senator and a rebel leader. Her real father, Darth Vader, never knew the truth. After winning the Galactic Civil War, Leia married Han Solo and led the Resistance against the sinister First Order.

Palpatine

Born on Naboo, Sheev Palpatine became a senator and, through clever political scheming, Supreme Chancellor. Secretly, he was Sidious, Dark Lord of the Sith, controlling both sides in the Clone Wars and seizing absolute power as Emperor. He was destroyed by his former pupil Anakin Skywalker.

Captain Phasma

Alongside General Hux and Kylo Ren, Captain Phasma was one of the key commanders of the First Order. She was in charge of training stormtroopers and led them into battle herself. Her distinctive armor was coated with chromium salvaged from a starship once owned by Emperor Palpatine.

R2-D2

Heroic astromech droid R2-D2 witnessed some of the galaxy's most crucial events, from the invasion of Naboo and the Clone Wars to the rise and fall of the Galactic Empire. He accompanied both Anakin and Luke Skywalker on adventures and was key in efforts to destroy the Death Star.

Kylo Ren

At his birth, the son of Han Solo and Leia Organa was named Ben. His Jedi training with Luke Skywalker ended in tragedy when, seduced by the dark side, he betrayed the other students and became responsible for their destruction. As Kylo Ren, the First Order's enforcer, he killed his father on Starkiller base.

Rey

Rey grew up on the planet Jakku, where she had been left at an early age. She scavenged the ship graveyard for parts to trade to her guardian, the junkboss Unkar Plutt, and waited for her family. A chance encounter with a Resistance droid led her to leave the planet and discover her destiny as a Jedi.

Anakin Skywalker

Anakin Skywalker was discovered as a child slave on the planet Tatooine by the Jedi Master Qui-Gon Jinn. His incredible potential led to his being trained as a Jedi, and he became one of the Republic's greatest heroes. However, he came under the sway of the Sith Lord Darth Sidious and fell to the dark side.

Luke Skywalker

The farm boy from Tatooine who longed for the stars became one of the galaxy's most important figures. The last Jedi Knight trained by Obi-Wan Kenobi and Yoda, he joined the Rebel Alliance, turned his father, Anakin Skywalker, back to the light, and overthrew the Emperor. Later, he withdrew from galactic affairs.

Han Solo

A smuggler, rogue, famed pilot, and crack shot, Han Solo became caught up in the Galactic Civil War when he was hired to take Obi-Wan Kenobi and Luke Skywalker to Alderaan. He joined the rebels, helped win the war, and married Princess Leia, but was later tragically struck down by his son, Ben.

Hera Syndulla

The daughter of famed Twi'lek freedom fighter Cham Syndulla, Hera grew up on her home planet Ryloth as the Clone Wars and Imperial occupation ravaged it. Hera decided to leave Ryloth in her ship, the *Ghost*, to fight the Empire and became a founding member of a rebel cell based on Lothal.

Mother Talzin

The leader of Dathomir's Nightsisters, Mother Talzin was a powerful sorceress who wielded the dark side of the Force. She plotted both with and against the Sith Lords Sidious and Tyranus, who eventually sent Grievous to destroy her clan. She was killed saving her son Darth Maul, from Palpatine and Dooku.

Ahsoka Tano

Grand Master Yoda assigned this young but talented Togruta Jedi to Anakin Skywalker as his Padawan learner. She served heroically in the Clone Wars before a sinister plot led her to leave the Order. Later, as the agent Fulcrum, she helped establish a network of rebels against Imperial tyranny.

Wilhuff Tarkin

Ruthlessly ambitious and highly intelligent, Wilhuff Tarkin rose through the ranks of the Imperial military to become one of the most powerful men in the galaxy. As Grand Moff, he commanded the first Death Star, destroying the planet Alderaan. He was killed when the battle station exploded.

Lor San Tekka

Lor San Tekka was an explorer who was fascinated by the legends of the Jedi and became a member of the Church of the Force, which kept Jedi ideals alive in the age of the Empire. He possessed a map that could help locate Luke Skywalker and gave it to the Resistance before Kylo Ren struck him down.

Shaak Ti

The Togruta Jedi Master Shaak Ti was a member of the High Council during the Clone Wars and was responsible for the training of the Republic's clone army on the planet Kamino. Though a skilled and cunning warrior, she was killed by Darth Vader during the Jedi Purge as she meditated in the Temple.

Luminara Unduli

A member of the Jedi High Council, Luminara Unduli was one of the most highly respected Jedi Masters of her time. Following the victory of Emperor Palpatine over the Jedi, Unduli was executed on Stygeon Prime and her image was used as a trap to draw in survivors of Order 66.

Darth Vader

When Anakin Skywalker turned to the dark side, his new master dubbed him Darth Vader. Terribly injured on Mustafar, he was sealed into cyborg life-support armor and served the Emperor as his feared right hand. Later, he turned on his master, destroying him to save the life of his son, Luke Skywalker.

Asajj Ventress

Born on Dathomir into the Force-using clan of Nightsisters, Ventress was apprenticed to the Sith Lord Count Dooku and became his assassin. Dooku and Ventress eventually tried to kill each other, and she struck out on her own as a bounty hunter. She died heroically, protecting the Jedi Quinlan Vos.

Mace Windu

Jedi Master Mace Windu was known as one of the Order's greatest champions. His skill with a lightsaber and the Force was almost unmatched. He fought many key battles of the Clone Wars, including the raid on Geonosis, as a general. He was killed by Darth Sidious while trying to arrest the Sith Lord.

Sabine Wren

Sabine Wren was born into the Mandalorian warrior tradition. As a child, she joined the Imperial Academy as a cadet. However, the Empire's oppression led her to flee her home planet and join a cell of rebels on the planet Lothal. She was a weapons and explosives expert and a keen artist.

Yoda

The Grand Master of the Jedi Council was the wisest and most powerful of them all. However, he failed to uncover the Sith Lord Sidious and arrogantly chose to face him in single combat. After Palpatine fought him to a standstill, Yoda retreated into exile, where he eventually trained Luke Skywalker.

Abafar to Yavin 4

Abafar: A barren world rich in rhydonium. During the Clone Wars, the Separatists loaded a stolen freighter with this explosive and tried to use it to blow up a top Republic military conference. They were thwarted by D-Squad, a covert team of droids led by Colonel Meebur Gascon.

Dantooine: Once used by the Rebel Alliance as a base, it was the location given by Princess Leia to Grand Moff Tarkin when he demanded she reveal the rebel headquarters. Because Dantooine was too remote to demonstrate the Death Star's power, Tarkin targeted her home planet of Alderaan instead.

Serenno: A forested world that was home to Count Dooku, one of the central figures of the Clone Wars. An aristocrat who gave up his title to join the Jedi Order, he later became disillusioned and left to form the Separatists. He was also, secretly, Darth Tyranus, apprentice to Darth Sidious.

Stygeon Prime: The snow-capped mountains of Stygeon Prime hid the high-security prison known as the Spire. Darth Sidious imprisoned his former apprentice Darth Maul here. He also kept the remains of Jedi Master Luminara Unduli here to lure in any Jedi who survived the Order's destruction.

The Father interprets as test Anakin, to discover if he is truly the Chosen One.

It was on Lothal that the rebel cell founded by Kanan Jarrus and Hera Syndulla came together and won a series of notable victories against Imperial forces.

STARKILLER BASE

The First Order's ultimate weapon, even more fearsome than the Death Star, is constructed from an entire planet. It fires a beam of plasmic energy through hyperspace and is capable of destroying entire star systems. Recharging the weapon requires that the power of a sun be completely drained.

One scavenger, Rey, was abandoned on Jakku as a child and was later caught up in the struggle between the Resistance and the First Order

Malastare: The homeworld of the Dug species, Malastare is a forest world whose core is rich in valuable fuel. During the Clone Wars, the Republic tested an electro-proton bomb here, designed to knock out droid armies. However, it awakened the colossal Zillo Beast, which then went on a rampage

Naboo: One of the galaxy's most beautiful worlds, with lush grasslands, winding rivers, and tall waterfalls. The crust of the planet is riddled with holes and passages, which are filled with water. These can be used as a quick means of submarine travel from one part of the planet to another

Quarzite: The surface of Quarzite cannot support life. Its inhabitants, the Belugans and the Kage, fought a long war for control of the underground crystal caverns. Access to these caverns is only possible using a giant turbolift, which leads from an orbiting space station down into the planet's crust

Cerea: A beautiful world, largely unspoiled by the ravages of technology. It is home to the Cerean people, whose towering cone-shaped skulls contain a binary brain. Ki-Adi-Mundi was a famous Cerean Jedi Master who won many victories during the Clone Wars with his Galactic Marines.

A largely lawless world, Tatooine is controlled by the Hutt clans and is a hub of criminal activity. Smugglers and bounty hunters flock to shady dives in ports like Mos Eisley while gamblers bet on deadly podraces and back-room sabacc games in Mos Espa and elsewhere.

JAKKU

The desolate planet Jakku was the scene of the last great battle between the Galactic Empire and the Rebel Alliance a year after the death of the Emperor. The Graveyard of Giants—a vast plain of crashed starships—attracted scavengers who sold their salvaged technology to small traders.
Few people come to Jakku by choice.

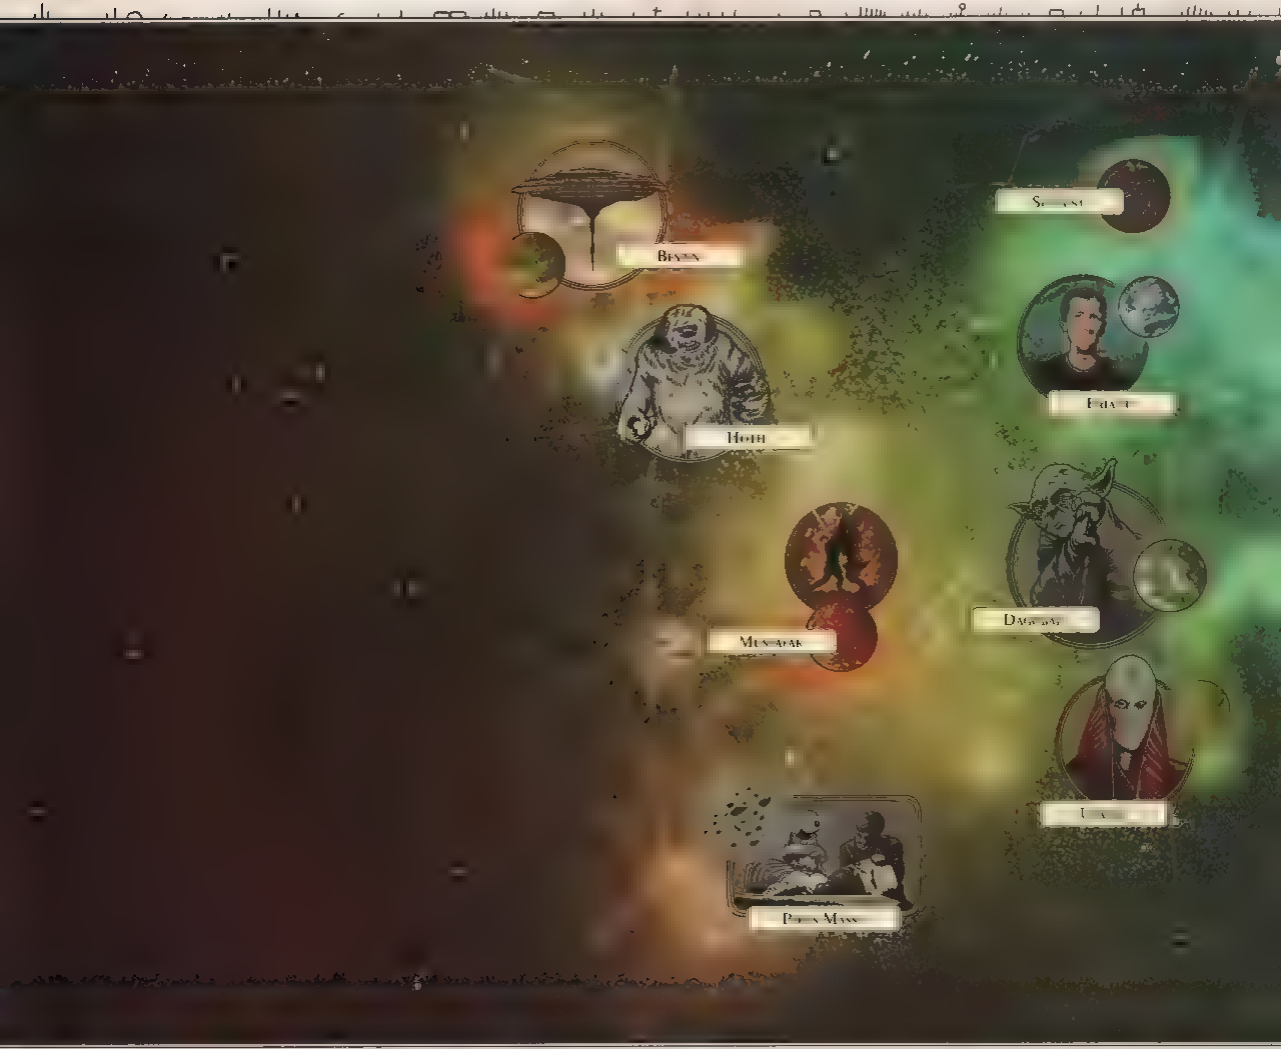
Andelm IV to Utapau

Andelm IV: A remote world known for its beetles, a source of the rare mineral dedlanite During the Galactic Civil War, a crime lord named Jaum enslaved the population, forcing them to harvest dedlanite for the Empire. His plans were foiled by the Wookiee Chewbacca and his friend Zarro

Arkanis: Rain falls endlessly on gloomy Arkanis, ranging from drizzle to thunderstorms. The Empire built an academy here, run by Commandant Brendol Hux, to train a generation of elite officers. It was also the site of Project Harvester, where Force-sensitive children were brought for mysterious purposes.

Bespin: A gas giant with no land, just layers of dense gas through which strange creatures swim Valuable tibanna gas is collected from vast creatures called beldons and processed in the floating habitats in the upper, breathable layer of atmosphere, including the famous Cloud City.



Kamino: This world is not on any maps. As part of an elaborate plot by Darth Sidious, it was erased from the Jedi Archives and only rediscovered when Obi-Wan Kenobi was investigating the attempted assassination of the Naboo senator Padmé Amidala. Kenobi traced the would be assassin to the Wild Space planet Kamino, an endless ocean whose inhabitants had mastered the science of cloning. The Kaminoans had been paid to create a clone army for the Republic, using the DNA of the bounty hunter Jango Fett the assassin Kenobi was following.

Mustafar: Lava spews from the volcanoes that cover Mustafar's surface while swarms of droids harvest rare minerals from the molten rock. Despite the searing heat of this harsh world, it is inhabited by the native Mustafarians, who labor in the mines and factories and live in underground caverns hollowed out by rock-eating lava fleas

Many dark deeds have taken place on Mustafar. Darth Vader betrayed and slew the Separatist Council here, ending the Clone Wars. He was then defeated and horribly maimed by Obi-Wan Kenobi.

Polis Massa: Once a planet, Polis Massa was mysteriously shattered into an asteroid field. A scientific base here studies the disaster, and following Order 66, Yoda and Obi-Wan Kenobi found safety at the research station. It was here that Luke Skywalker and Leia Organa were born

Dagobah: Grand Master Yoda once described Dagobah as "one of the purest places in the galaxy." He first came here toward the end of the Clone Wars, drawn by a strange message from his old friend Qui-Gon Jinn, who had died many years earlier. Jinn had discovered the secret to maintaining his identity after death and set Yoda on the path to discover it for himself.

Following his failure to defeat Emperor Palpatine, Yoda exiled himself to Dagobah to meditate on the Force until a new hope could arise. It was here that he met Luke Skywalker.

D'Qar: An obscure, tree-covered planet with no intelligent life and far from the main space lanes, D'Qar is of little interest. This made it a perfect choice as a secret base for the Rebel Alliance and later the Resistance—making it a target for the First Order's Starkiller weapon.

Eriadu: A once-savage wilderness of a world, until colonists tamed it. Among the early pioneers were the Tarkin family, who formed their own militia to protect against pirates and the local wildlife. Wilhuff Tarkin grew up here and learned many harsh lessons in survival.

Hoth: The frozen world Hoth was chosen as the new headquarters of the Rebel Alliance following the Battle of Yavin. The base was discovered by an Imperial probe droid, and Darth Vader moved swiftly to invade the planet. The rebels only narrowly escaped the Echo Base's destruction.

Ryloth: Ryloth has seen more than its share of war. During the Clone Wars, it was a battleground between the Republic and the Separatists as Mace Windu and his forces fought to liberate the planet. Later, freedom fighter Cham Syndulla opposed the Empire's cruel occupation.

A plot by Syndulla and his Free Ryloth group led to Emperor Palpatine and Darth Vader crash-landing on the planet after the Star Destroyer they were traveling in, the *Perilous*, was sabotaged and destroyed. However, the Lords of the Sith were able to escape the assassination attempt.

Sullust: A barren world of volcanoes and lakes whose people live in vast underground cities. Half of all Sullustans work for the SoroSuub technology corporation. Sullustans are well known as pilots. Nien Nunb famously copiloted the *Millennium Falcon* at the battle of Endor.

Utapau: Hyperwind storms batter the surface of Utapau, forcing many of the planet's inhabitants—the Utai and Pau'ans—to live in the giant sinkholes that lead down into the planet's crust. The Amani, recent settlers on Utapau, are hardy enough to dwell above ground in the grasslands.

During the Clone Wars, Utapau was an important base for the Separatists, and it was here that Obi-Wan Kenobi tracked down General Grievous and challenged him to a duel. After a fierce battle, the Jedi Master managed to tear open the cyborg's armor and destroy him using his own blaster.

Battle of Hoth

Darth Vader's forces discovered the rebel base on Hoth two years after the Empire's defeat at the Battle of Yavin. An overwhelming assault drove the rebels from the planet, but a fatal mistake by the Imperial Admiral Ozzel meant that Vader's plan to crush the Rebellion failed.
